4. press register camera

5. www.bristleup.com.au

Turn your camera on and navigate to the send to menu, put it on Molnus and press ok, then enter the APN for your sim for Telstra this is "telstra.internet. Now it should be working, send a test photo to make sure. To do this go back to the screen where you can see what the camera sees, take a test photo by pressing "shot" then press "OK", then press "Menu", then press "OK" again. This will send a test photo to the app.

TROUBLE SHOOTING

If the mobile app will not accept your mobile number then please change the number while registering. Then go into settings of the camera after it is registered and change the number back to the correct number. Then send test photo from the camera and your app should get it.
